[Click here](#)
for a recent picture of the construction site on the Ashlu River.

This is a dam on a river that was saved by due process and then given to a developer friend of the Premier of BC. The regulatory process and the environmental processes are a farce.

Ruining a highly productive salmon river would cause the public to react and so the government spares no expense to keep the truth from the public.

Under Gordon Campbell's BC Rivers are being given away. Absolutely no one is speaking for the public who own the electric energy system, the rivers, wind , thermal and tidal sites all being given away since 2002.
